

Mobile Lighting Towers

- Help To Reduce Crime
- Increase Site Accessibility
- Create a Safer Working Environment

Why Lighting Towers

Each year with the arrival of darker evenings we see a spike in criminal activity. Early planning is key to mitigating issues associated with inadequate lighting and even more so in 2020.

2020 is a unique year due to the outbreak of Covid-19. This means the possibility of lighting tower supply issues as large number of towers have already been deployed to test sites.

VPS can help by deploying low consumption, high powered lighting towers to your site

Do you deploy mobile lighting towers every year when the clocks go back?

Are you aware of a possible national supply issue this year due to a large scale deployment at COVID test sites?

Why VPS

Because all of our lighting towers are low consumption it means a saving between £50 - £100 per week in diesel costs being passed onto our clients. The additional benefit of this is a much quieter tower which can be placed in numerous locations.

Having VPS fulfill your lighting tower requirements also means:

Simplicity of service

1 number, 1 invoice

Supply chain consolidation

Reduced time and cost of supplier engagement and management

Integrated solutions

Holistic risk management and value generation

Technical Data

100l

Tank Capacity

91h

Running Time

110km/h

Wind Resistance

1280w

Lamps Power
